

Screw-on Felt Glide

Strong Conjunction

Material: Felt + TPR Base

Available Sizes

● 25/30/40/50/60/70 mm

■ 35x35 mm

- Strong conjunction between felt and base
- Sturdy fixing than self-adhesive pads
- Ø10 Pad dot for covering screw head
- Protect floor from scratching
- Easily moving furniture

Our new Screw-on Felt Glide comes with a new process to strengthen the conjunction between felt and base. The felt on traditional glides might fall off easily with time. However, we directly inject TPR base on felt to make sure they will hold together firmly. Besides, we have an extra felt dot to cover and prevent scratches from screw head. Our new solution of the floor protection not only can improve the durability of felt but also make moving furniture easy and quite.
